### FUND DESCRIPTION

This very low risk fund invests in cash and short-term deposits, and aims to give a stable and predictable return. While the fund is intended to be very low risk, members should be aware that it could fall in value. The fund is benchmarked against the 3 month Euribid rate, which reflects the rate of interest achievable for institutional investors (such as pension scheme providers) on short-term deposits. It is not guaranteed and can experience negative returns, depending on the prevailing interest rates offered by highly rated counterparty banks, and the Annual Management Charge of the fund.

The fund can be used to protect the value of member's funds against market movements. For members who are close to retirement it is particularly useful for that element of the fund that will be taken as a tax-free lump sum.

Warning: If you invest in this product you may lose some or all of the money you invest.
