FUND DESCRIPTION

This is a high risk fund with 100% invested in equities and can have a high level of volatility. The benchmark is the Solactive ILIM Sustainable Global Market Equity Index. This index is designed to deliver equity market returns with enhanced exposure to more sustainable companies and a better alignment to the low carbon transition economy. Over time, both the fund and the index are expected to produce returns in excess of inflation and cash returns.

The index uses both exclusionary screening and integrates sustainability criteria into its security selection process, both of which Irish Life believe can improve the risk profile of the fund's portfolio relative to the respective market capitalisation index.
