Centre**

**The
Response
Network**

TeleCare – The Technology

Connect + Unit

Pendant

Telecare – Community/Group Housing

- Warden Call system with handsets to enable staff communicate directly with residents and vice versa
- Speech Module in each flat and communal areas
- Pull cords and pendants as standard
- Optional door entry system – Residents and staff
- TeleCare Overlay available

Fold & Galway Brothers of Charity

- Fold provide telecare awareness session for staff
- Site Assessment, options given & recommend a suitable package
- Installation of system
- Training & demonstration with staff and residents following installation
- Additional telecare sensors can be added or removed as needs change

Flood Detector

Smoke Alarm

Pull Cord

Movement Detector

Fall Detector

Epilepsy Sensor

- Detects Respiration
- Detects Pulse Rate
- Sensor placed under the mattress
- Call sent to response centre allowing carer to respond

Exit Alert

- Sensors placed on door and will alert automatically if client leaves
- Programmed to suit the persons daily pattern
- Can be programmed for certain times of day, e.g. if only at risk at night time.
- Key switch for carers to switch off if applicable.

Bed Sensor

- ▶ Falls alert – will send an alert if someone gets out of bed and does not return within the pre-set time.
- ▶ Lights can come on to guide user.
- ▶ Alert immediately to signal movement

ADLife- Activities Daily Living

- Early warning system by providing detailed information on daily living activities– built on real time alerts
- Data includes: electrical appliances, time spent in bed etc
- Access the information over the internet to help recognise any emerging problems e.g. increased visits to bathroom, not opening fridge etc

Fold's Monitoring Service

- Fold TeleCare monitors over 22,000 people, covering 32 counties
- Provides support out of hours for residents in the absence of staff
- Speak directly to resident
- Morning Call facility
- Birthday Calls
- TSA accreditation
- Calls history/recordings available on request

Where is telecare used & who needs it

- Community – widely in individual homes through various grants and schemes, also privately
- Supported Housing – Cherryfields, Anam Cara (Frail Elderly and dementia)
- Community/Group Housing – Dunfirth Farm, Knockeden (Autism/epilepsy), Galway Brothers of Charity
- Cluid Housing Ass, Dublin City Council, Limerick City Council
- Nursing homes – additional support for staff

Benefits for Service User

- Increased choice of type of care
- More Community Based Services
- More Responsive Services
- Improved quality of Life
- Increased independence
- Increased chance of “staying put”
- Reduced Care Costs

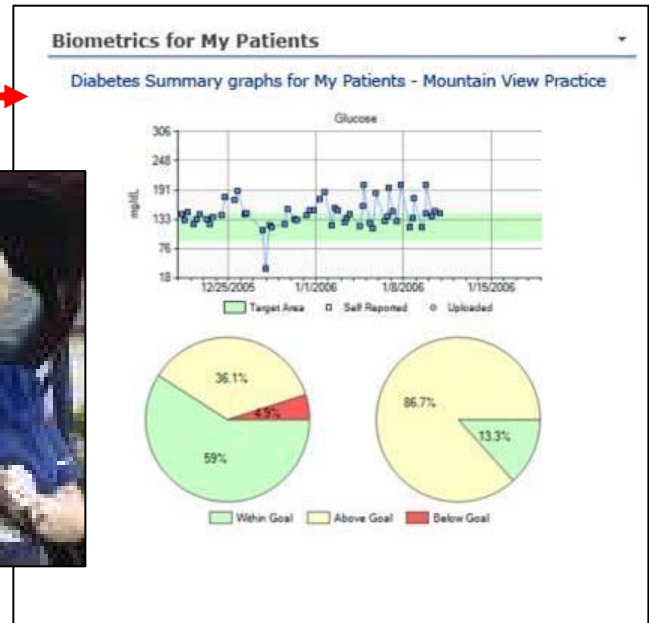

Benefits Family & Carers/Staff

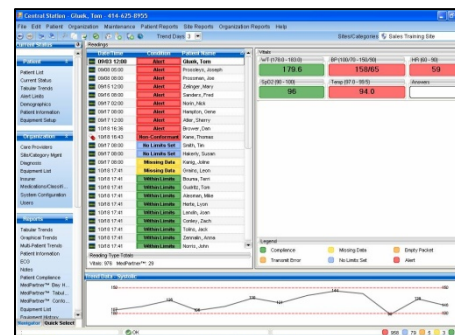

- Peace of Mind
 - Anxiety considerably reduced
 - Called when an event occurs
- Reduced Stress
 - Enabled carers to remain in their own home at night
 - Reduces staff levels
 - Enabled visits for social/care purposes rather than 'check calls'
- Increased independence

Stand-Alone Telehealth Monitoring

Automated, Simple condition Multiple vital-Signs measurement

The Opportunity for Telehealthcare

- The TF3 consortium, comprising Tunstall, Fold and S3 has recently been awarded the contract to provide telehealth services to all 5 health trusts in Northern Ireland.
- The managed service will support in excess of 8000 patients
- 24/7 - Reassurance & Support
- Improved quality of care based on improved information
- Building on interest in self-management
- Maximising Limited Care Resources
- Cost Benefits
