FUND DESCRIPTION

This is a low to medium risk fund, which aims to have a mix of lower risk assets such as cash and bonds and higher risk assets such as shares and property. This fund features several risk management strategies. Irish Life Investment Managers monitors and rebalances the fund regularly and may change the mix over time. The benchmark performances and returns reflect the long term expected return from the fund which is cash deposit rates (measured by the Euro Short-Term Rate since January 2022) plus 3% per annum. This is not guaranteed and the fund can experience negative returns.

The assets in this fund may be used for the purposes of securities lending in order to earn an additional return for the fund. While securities lending increases the level of risk within the fund it also provides an opportunity to increase the investment return. Part of this fund may borrow to invest in property. Non euro currency exposures may be fully or partly hedged back to euro to reduce foreign currency risk.

This fund is provided by Irish Life Assurance plc and is managed by Irish Life Investment Managers.

Warning: This fund may be affected by changes in currency exchange rates.

CUMULATIVE PERFORMANCE

Fund returns are quoted before taxes and after a standard annual management charge of 0.29%. Annual fund management charges are calculated AND deducted based on the offer price of the fund. The unit price AND VALUE of the fund are always quoted after an allowance has been made for the fund management charge. There is no Bid/Offer spread.

Launch Date (for the series used in the above performance illustration) = 26 Feb 2015; YTD = year to date; p.a. = per annum

Benchmark: The standard against which the performance of the fund is measured. It typically includes market indices or weighted combinations of these as appropriate.

Warning: Past performance is not a reliable guide to future performance.

Warning: The value of your investment may go down as well as up.

RESPONSIBLE INVESTING KEY CHARACTERISTICS

RESPONSIBLE INVESTMENT APPROACH

In line with the overall fund objective, the fund targets investment in strategies which help contribute to achieving its sustainability goals.

This involves selecting strategies which exclude or reduce exposure to companies with poorer sustainability characteristics and increasing exposure to companies with better sustainability characteristics. Sustainability characteristics are also considered in the selection of property and alternative funds.

ESG RISK RATING

The Environmental, Social & Governance (ESG) Risk Rating measures the degree to which a company's economic value is at risk due to not considering ESG factors using a calculation of the company's unmanaged ESG risks.

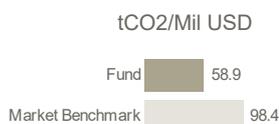

*A lower score indicates a lower level of unmanaged ESG risk and potential risk to the economic value.

Sustainalytics' ESG Risk Ratings measure a company's exposure to industry-specific material ESG risks and how well a company is managing those risks. This multi-dimensional way of measuring ESG risk combines the concepts of management and exposure to arrive at an absolute assessment of ESG risk. Sustainalytics identifies five categories of ESG risk severity that could impact a company's enterprise value.

Negligible	Low	Medium	High	Severe
0 - 10	10 - 20	20 - 30	30 - 40	40+

CARBON INTENSITY

Carbon intensity is a metric used to compare company emissions across industries. The absolute emissions is divided by total earnings with the figure expressed in tonnes of carbon dioxide equivalent per million USD of total revenue.

FOSSIL FUEL

Fossil Fuel Involvement measures the percentage of earnings that companies get from thermal coal extraction, coal-based power generation, oil and gas production, oil and gas based power generation, and oil and gas related products and services.

Note on Calculation of Sustainability Characteristics:

ESG metrics data sourced from Sustainalytics (Powered by Sustainalytics).

ESG risk scores and carbon metrics are currently calculated for Shares and Corporate Bonds only which represent 58.6% of the total portfolio. This reflects the majority (but potentially not all) of the Global Shares and Corporate Bonds in the portfolio.
