FUND DESCRIPTION

This fund invests in bank deposits and short-term investments on international money markets and aims to give a stable and predictable return. The value of the fund is not guaranteed and it can experience negative returns, depending on the prevailing interest rates offered by highly rated counterparty banks, and the Annual Management Charge of the fund. The fund can be used to protect the value of member's funds against market movements. For members who are close to retirement it is particularly useful for that element of the fund that will be taken as a tax-free cash.

Warning: If you invest in this product you may lose some or all of the money you invest.
